

Lord of Mysteries Community Platform MVP UI/UX Design Document

Version 1.0

1. Purpose

This document defines the user experience, navigation, screen inventory, user journeys, reusable UI components, permissions, and feature flows for the MVP of the Lord of Mysteries Community Platform. It serves as the implementation blueprint before software development begins.

2. User Journeys

Join Community: Open app → Register → Verify Email → Create Profile → Set Reading Progress → Home Feed

Create Post: Home → Create Post → Optional Image → Optional Spoiler → choose spoiler chapter → Publish → Feed

Read & Interact: Feed → Open Post → read comments → Like → Comment → Reply

Search: Search → Users / Posts / Wiki / tags → Open Result

Wiki: Wiki Home → Category(characters / pathways / artifacts / organizations → Page

Manage Reading Progress: Profile → reading progress → current book → current chapter → save

3. Information Architecture

Authentication, Home, Search, Wiki, Notifications, Profile, Admin.

(Each of those expands into smaller sections.)

EX: Profile → posts, comments, followers, following, saved posts, reading progress, settings

4. Navigation

Mobile: Home, Search, + , Notifications, Profile.

Website: Left sidebar with Home, Search, Wiki, Notifications, Bookmarks, Profile, Settings.

5. Screen Inventory

Authentication: Splash, Login, Register, Verify Email, Forgot Password, Reset Password.

Home: Feed, Create Post, Edit Post, Post Details.

Profile: View, Edit, Followers, Following, Reading Progress, Settings.

Search: search Home, Results. (user, wiki & post results)

Wiki: Home, Character, Pathway, Artifact, Organization & Location pages.

Notifications: list of notifications.

Admin: Dashboard, Reports, Users, Wiki Management.

6. Reusable Components

Avatar, Button, Search Bar, Post Card, Comment Card, Profile Card, Wiki Card, Tag Chip, Notification Card, Dialog, Loading Spinner.

7. Feature Flows

Each feature follows UI → API → Service → Database.

Example: Click + → Create Post screen opens → Types content (optional) upload image → (optional) Mark as spoiler → choose spoiler chapter → publish → frontend validates → API request → Database store post → Notification sent → Feed refreshes → Post appears.

8. Error Handling

Handle duplicate email, invalid credentials, network failures, expired sessions, upload failures, missing spoiler chapter, unauthorized access.

9. Permission Matrix

Feature	Guest	User	Admin
View feed	✓	✓	✓
Create post	✗	✓	✓
Comment	✗	✓	✓
Follow users	✗	✓	✓
Edit wiki	✗	✗	✓
Ban users	✗	✗	✓
Manage platform	✗	✗	✓

10. Development Sequence

Authentication → Profiles → Posts → Comments → Likes → Following → Search → Wiki → Reading Progress → Notifications → Admin Panel.
